Profile

Seasoned software quality and automation leader with over 20 years of experience in designing, developing, and managing test automation frameworks for enterprise and industrial automation systems. Proven expertise in leading cross-functional teams, architecting scalable test solutions, and driving continuous integration and delivery (CI/CD) practices. Adept at aligning testing strategies with business goals, fostering innovation, and delivering high-quality software products across diverse platforms and technologies. Recognized for excellence in leadership, test management, and customer collaboration in global delivery environments.

Education

Master of Science in Computer Science, *Liverpool John Moores University*

2021 – 2022

Post Graduate Diploma in Software Development (Full Stack), *IIIT-Bangalore*

2020 – 2021

Bachelor of Computer Applications, *ICFAI University*

2007 – 2011

Diploma in Electronics & Communication Engineering, *VET BVL Polytechnic, Bangalore*

1998 – 2001

Key Skills

- Python, C#, Java, SQL, JavaScript
- Selenium, Cucumber, Playwright, Appium, Serenity BDD, Postman, JMeter
- GitHub Actions, Jenkins, AWS, Azure, BrowserStack
- Functional, Regression, API, UI/UX, Embedded Systems
- Test Strategy, Automation Architecture, Agile Collaboration, Team Management

Career Achievement

- Automated 40% of test cycles with scalable frameworks across platforms.
- Built cloud dashboards for real-time QA insights.
- Integrated CI/CD with GitHub Actions, boosting release speed.
- Cut regression time by 50% using reusable test components.
- Led global QA teams and agile delivery initiatives.
- Delivered award-winning performance in innovation and productivity.
- Developed real-time monitoring systems for industrial automation.

Professional Experience

Lenze Software Development Center India, *Principal Software Tester*

04/2021 – Present

- Transformed manual testing processes into fully automated pipelines, reducing test cycle time by 0%
- Led the development of cross-platform automation frameworks for desktop, web, and mobile platforms
- Enabled real-time visibility of test metrics through cloud-integrated dashboards
- Streamlined CI/CD workflows using GitHub Actions, accelerating release velocity

Honeywell Automation India Limited, *Lead Engineer - QA Automation*

06/2005 – 03/2021

- Architected robust test automation frameworks for mission-critical industrial systems
- Managed global QA teams and collaborated with cross-functional stakeholders
- Reduced regression testing time by 50% through reusable automation components
- Received multiple awards for innovation and delivery excellence

Transtech Projects Private Limited, *Senior Software Developer*

02/2003 – 05/2005

- Developed custom data acquisition and inventory systems for industrial clients
- Integrated P'LC and RS-232 communication protocols for real-time monitoring
- Enhanced data visualization and reporting for plant operations
